

True Masonry Fireplace

For your convenience, this guide will help our NFI certified professionals quickly identify and guide you to products compatible with your existing fireplace.

It isn't required, but it would help our professionals get a complete view of your fireplace, take three pictures (cell phone pictures will do)

1. The front of the fireplace, including both the hearth and the mantel
2. The ceiling inside the fireplace
3. The top of your chimney (from the ground)

At Fireplace By Design we welcome you to come and see our extensive selection.

Bringing in your completed measurement guide will get you a discount of \$25 off installation.

A	Front Opening Width	
B	Front Opening Height	
C	Rear Width	
D	Fireplace Depth
